

2020-2021 School Attendance Information

Dear Parents/Guardians:

As in previous years, all schools will be required to record attendance during the 2020-2021 school year. This task will include taking attendance for students who are on campus for face-to-face instruction as well as ones who are engaged in remote instruction. You will receive a detailed letter describing the process for attendance, both face-to-face and while involved in remote instruction. It is important to note that your student needs to be working and maintaining contact with his/her teachers when not on site at school. Please let us know if you have any questions after reviewing the attendance information.
