Dear Parents/Caregivers and Staff:

RE: NOTICE OF PESTICIDE APPLICATIONS

The State of Connecticut (Public Act 99-165) requires all schools in the State to implement a plan of action for pest control. ISAAC has adopted an (IPM) Integrated Pest Management Program for pest control within our building. Our main focus will be to control pest problems at their early stage without having to use pesticide.

Pesticide will not be applied on regular basis however, if a pesticide application is needed to eliminate a large amount of pest infestation, we will notify you no later than twenty-four hours prior to any application being made. All records will be kept in ISAAC's Facilities Office.

Notification will include:

- The name of the active ingredient of the pesticide being applied
- The target pest
- The location of the application on the school property
- The date of the application
- The name of the contractor applying the active ingredient

If you have any questions you may contact me at Ext. 108.

Thank you,

Willie Quiñones, Jr.
Facilities Manager
