

Value

National CooperativeRx_® is a not-for-profit cooperative that helps members navigate pharmacy benefits. Consultation, education and representation: this is the value of National CooperativeRx_®.

Member-ownership

Our objectives match yours because we're member-owned

- Member-ownership allows members to determine the direction and governance of the coalition.
- Not-for-profit, and transparent financial terms, show that our objectives are aligned with yours.

Consultation

Independent clinical consultation on plan design

- An In-house Pharmacist is available to help you tailor your plan design to fit your needs and the needs of your participants.
- Clinical Programs educate health care providers and plan participants on cost-savings opportunities.

Education

Educational tools for you

- Weekly eNewsletters inform you of current news in the PBM industry and how it affects you.
- Quarterly Webinars for plan design, industry trends and resources for you and participants.
- An Annual Meeting where you're invited to join us for lectures from the experts.
- Additional Resources, such as handouts, are available on our web site and upon request.

Educational tools for your participants

 Educational Mailings to plan members and physicians are sent by the cooperative to enhance prescription compliance, encourage generic utilization and control prescription costs.

Representation

Strength in numbers allows for more purchasing power

- Competitive Costs are obtained through aggregated purchasing power. We continue to re-evaluate the contract with our PBM partner to ensure we lead the market.
- Hiring Independent Auditors on 100% of claims, for all members. We ensure recoveries go back to you.

History

The cooperative was founded when a group of employers and coalitions began examining their PBM options, and found the industry to be confusing, with pricing that benefited the PBM, not necessarily the payer. Not finding a transparent solution in the existing market, they created National CooperativeRx®.

We're different because we're not-for-profit. Our main goal is to get our members the best services at the best pricing.

Owned by a diverse group of employers and health plans across the United States, our large group allows us strength in numbers when negotiating contracts.

Our biggest success is keeping our trend low by helping plan sponsors create customized plan designs, while also helping members avoid errors, adhere to their medications and make cost-effective choices.
