**Florida Department of Health Issues Daily Update on COVID-19**

**~Hospitalizations, Positive Test Results, Long-Term Care Facilities and Fatalities Continue to Show Significant Movement in the Right Direction~**

**TALLAHASSEE** — The Florida Department of Health (DOH), in order to provide more comprehensive data, releases a report each day on COVID-19.

## **Hospitalizations:**

Today, data reported to the Agency for Health Care Administration shows that the number of COVID-19 positive patients that are currently hospitalized is down more than 70 percent since July. As posted on the Agency for Health Care Administration's hospitalization [dashboard](#) at 1:30 p.m., there are 2,383 current hospitalizations with a primary diagnosis of COVID-19.

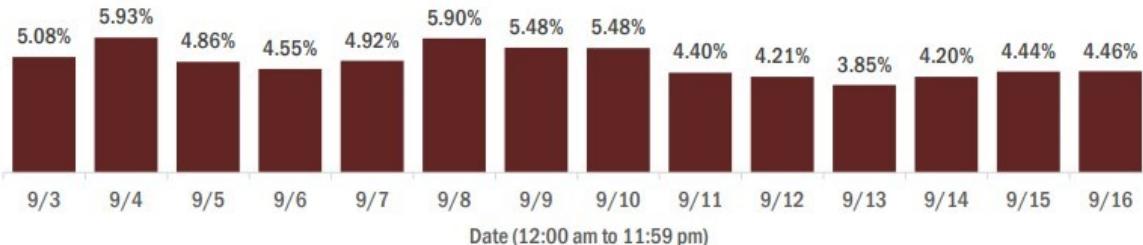

## **Positive test results:**

- Yesterday's statewide positivity rate for new cases is 4.46 percent.
- Yesterday was the thirty-sixth straight day below 10 percent positivity of new cases.

### **Percent positivity for new cases in Florida residents**

**The percent of positive results ranged from 3.85% to 5.93% over the past 2 weeks and was 4.46% yesterday.**

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

## **Overall testing:**

- Yesterday, test results for more than 80,700 individuals were reported to DOH.
- As of September 17, 674,456 individuals have tested positive for COVID-19 in Florida.

**Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories**

	Florida residents	Non-Florida residents
Total tested	<b>4,997,489</b>	<b>20,568</b>
Positive	<b>666,507</b>	<b>7,949</b>
Negative	<b>4,323,939</b>	<b>12,578</b>
Inconclusive	<b>7,043</b>	<b>41</b>
Awaiting testing	<b>3,785</b>	<b>32</b>

Cumulative percent positivity  
(based on positive and negative results from March 1 - present)

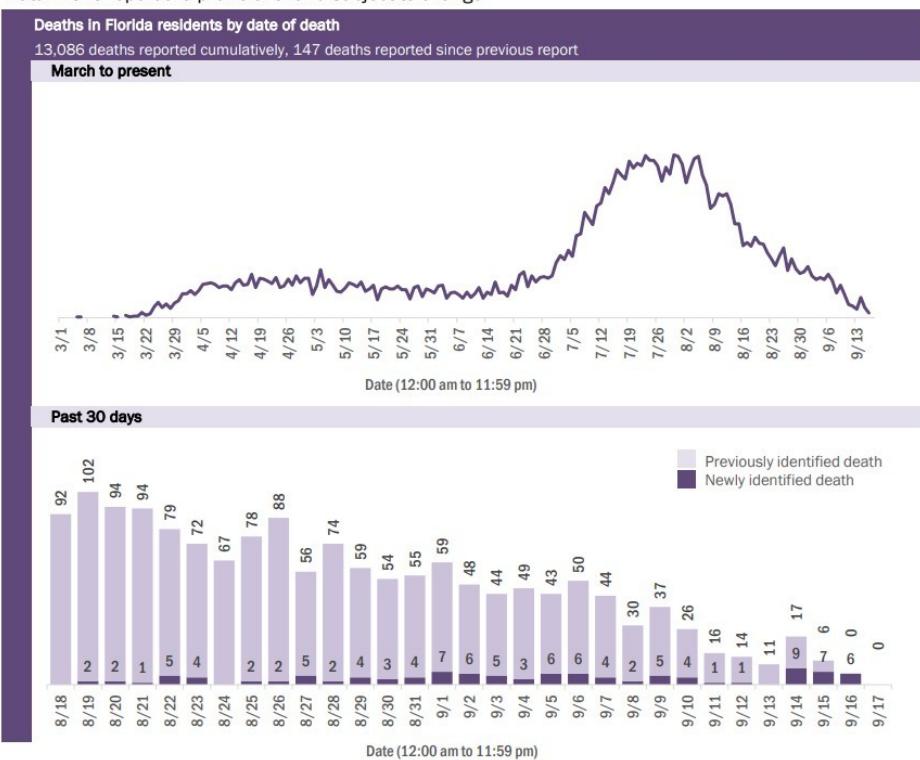

### Fatalities by date of passing:

Today, data reported to DOH shows there has been a steady decline in the number of reported Florida resident deaths who were previously diagnosed with COVID-19. The first week of August compared to the first week of September, shows a 74 percent decrease in the average number of reported COVID-19 related deaths.

### COVID-19: cases in Florida residents who have died

Data through Sep 16, 2020 verified as of Sep 17, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

### Florida long-term care facility data:

- The list of long-term care facilities with active COVID-19 cases is available [here](#).
- The list of long-term care facilities with deaths is available [here](#), which is updated weekly.
- To date, 5,337 individuals that were staff or residents of a long-term care facility have died.

In order to make the daily COVID-19 report easier to download and more accessible, the daily report separates case line data in a separate PDF. The case line data report is available [here](#). The state also provides a report detailing surveillance data for every Florida county, which is available [here](#). The antibody COVID-19 test results report will be provided once a week and contains county, race and

lab information on antibody COVID-19 tests conducted in Florida. The report for antibody tests conducted by private health care providers is available [here](#) and the report for antibody tests conducted at state-supported COVID-19 testing sites is available [here](#).

**More information on a case-by-case basis can also be found [here](#).**
