

Skyward no longer supports Google Translator options from within the software. We would like everyone to be aware that although the Google Translator Toolkit is being shut down, most web browsers have built in translators that can easily be used instead.

**What does this mean to me?**

If you do not use the Google translate option within Skyward, you will not see any changes and no further action is required.

If you do use the Google translate option within Skyward, you will no longer see the "Select Language" option inside of Skyward Family/Student Access (below) to translate the application into other languages.

It will be necessary to change the settings within your internet browser (Google, Firefox, etc.) to translate the Skyward pages for you.

**How can I enable the translate options in an internet browser?**

While we cannot provide instructions for every internet browser, the steps for how to change the language displayed within Chrome/Google and Firefox are outlined below.

To enable or disable translation services in **Chrome/Google:**

1. On your computer, open Chrome.
2. At the top right, click **More**  **Settings**.
3. At the bottom, click **Advanced**.
4. Under "Languages," click **Language**.
5. Next to the language you'd like to use, click **More**.
6. Turn **Offer to translate pages in this language** on or off.

To enable or disable translation options in **Firefox:**

1. Open the Firefox menu in the top right of the browser window.
2. Click **Preferences**.
3. Click **Choose** in the **Language and Appearance** section.
4. Select the language to add.
5. Click **OK** to save your changes.

If you need further assistance translating the Skyward pages into a different language, please email Michelle Harless at [michelle.harless@hck12.net](mailto:michelle.harless@hck12.net).
