

ASBESTOS ALERT

July 1, 2018

This is to inform all persons visiting, working in or attending classes in a Vidalia City School facility that all of our facilities have been inspected by quality technicians and certified by laboratory tests for the presence of both friable and non-friable Asbestos Containing Building Material (ACBM). An ACBM Management Plan has been developed and approved by the State Department of Education and the EPA which addresses the removal of such materials from or the management of known contaminated areas.

It is important to note that not all ACBM needs to be removed from said areas to make them safe to occupy or work in. Once ACBM has been identified, a plan can be implemented to insure that it is maintained in good condition and that appropriated precautions are followed when the materials are disturbed for any reason.

The notification has been made in accordance with the requirements of law and anyone desiring to review the ACBM Management Plans for the system or any of its facilities may do so at the Vidalia Board of Education Office, 301 Adams Street in Vidalia. Persons desiring copies of these plans for their own use may do so by paying the cost of reproduction which is twenty-five cents (\$.25) per sheet.

A handwritten signature in black ink, appearing to read "J. Garrett Wilcox". The signature is fluid and cursive, with a large, sweeping flourish at the end.

J. Garrett Wilcox, Ed. D.
Superintendent
