### Why are flu shots important?

Each year in the United States, on average:

- ✓ More than 200,000 people are hospitalized with flu-related complications.
- ✓ 20,000 of those hospitalized are children younger than 5 years old.
- ✓ 36,000 people die from the flu

### Who should receive a flu shot?

- ✓ Everyone 6 months or older
- ✓ People at high risk for serious flu complications
- ✓ This includes young children, pregnant women
- ✓ Those with chronic medical conditions
