Passcode: 830432

Brought to you by

We look forward to having you at this event!

The last year has challenged us to rethink how we live, work, interact, and view the world. It has become a delicate balancing act between keeping our kids and families safe from a pandemic, coming to terms with more screen time, and managing the transformation of our homes into offices, classrooms and more.

Join us for a conversation about the opportunities and challenges our families and kids' have experienced with technology due to COVID-19. From TikTok to Zoom to Roblox, hear some best practices on how to help your kids use the internet in safe and healthy ways. These include tech tips as well as guidelines and exercises you can use with your kids. There will be ample opportunity to raise your concerns and ask questions, too!

A few reminders:

- The session will run about 75 minutes (which includes time for questions).
- If the event is offered in other languages, please select the language by clicking on the translation icon  at the bottom of the screen.
- Attendees will neither be seen nor heard during the event. However, participants can chat and submit questions at any time using the Q&A button.
- After you leave the session, you should see a very short survey. Please provide feedback!
- Those who complete the feedback **and** provide an email address will be entered to win a 1-year license of Trend Micro Maximum Security, to protect up to 5 devices in your home.

About Your Presenter

Lynette Owens is the Founder and Global Director of Trend Micro's Internet Safety for Kids and Families program with the mission of helping kids around the world become great digital citizens. Founded in 2008, the program has now reached over 2.8 million students, parents and teachers in 20 countries.

With over 25 years of experience in the technology industry, Lynette regularly speaks, blogs and works with communities and school districts around the world. She has helped build a global force of hundreds of employee volunteers and a network of collaborations with non-profit organizations, technology companies, schools, and government and law enforcement organizations to make online safety, digital citizenship, and media literacy education a priority for every child.

Lynette holds a B.S. from Boston College and an M.B.A from the University of California at Berkeley. She serves on the board of the National Association of Media Literacy Education, and on the advisory boards of INHOPE and U.S. Safer Internet Day. She is a mother of two, wife of one, tireless pro-youth, pro-tech advocate and believer that the impact of technology on society is completely in our hands.
