

Southern Local

SCHOOL DISTRICT

EDUCATIONAL OPTIONS

Here at Southern Local, we realize that sending your student to school in the typical manner for the 2020-2021 school year may not be the best option for your family at this time. If your student is immune compromised, or lives with a family member that is immune compromised, you may need another option for their education. We want to provide you with an alternate means to educate your student if necessary. **Families choosing the online option for their student(s) please notify the school on or before August 10th.**

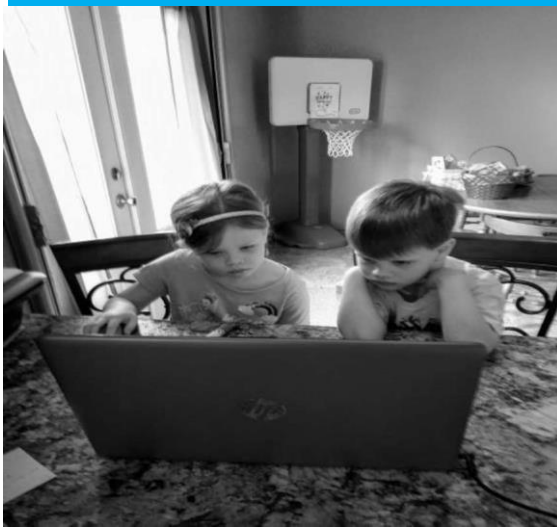

TRADITIONAL LEARNING

This option is for the majority of our students. Following guidelines set by the district, based on information from the CDC, school will take place with consideration of the health of our staff and students and cleanliness of our facilities.

ONLINE LEARNING

This option is where a student is at home completing curriculum and learning through an online platform. Communication would be with the Southern Local teacher assigned to monitor the student's progress in the classes. The online curriculum will be aligned to the Ohio Learning Standards.

REMOTE LEARNING

This option applies to students who attend face-to-face in the building but must complete online work due to a building or district closure. Remote learning would take place until the school or district reopened following a closure.

***Please note: All students, regardless of learning platform, will receive breakfast and lunch.**
