

## Questions and Answers

Q. I was curious if the school will be entertaining bids for each of the requested services individually or if you are requiring the bid to include all of the requested devices and services? As it sits, I believe that we could be a substantial offering for the Maintenance and Support pieces, but was curious if you would accept bids for just that line item of services?

A. On the UPS item, we would like there to be one bid (that covers equipment and maintenance). The firewall solution can be an individual bid as well as the wireless controller solution.

Q. Looking to see if your IT team would take a demo for an alternative firewall solution?

A. We are not scheduling meetings or demos for this RFP.

Q. Is there an RFP for the Category 1 Services?

A. The 470 acts as our RFP.

Q. In looking at the website for your locations, I am only seeing the following schools below. The 470 states 11 entities. If they are additional locations that need to be added, can you please supply me with those addresses.

A. The internet location is only required at the following address:

2541 Dorwood Drive, Jennings, Mo 63136

Q. Are you looking for a shared internet scenario with services coming into the School district HQ and each school sharing the service, or are you looking for Dedicated Access to each location.

A. It is a shared connection across the district.
