

Student Name: _____

Advisement Confirmation
March 2019

Advisement Teacher/Grade: _____

-  I understand that I must earn a minimum of **24** units and pass all required classes to graduate (See Graduation Plan).
-  My advisor has reviewed my transcript with me and has helped me understand the courses I must take to meet graduation requirements according to my plans after high school.
-  I understand that the master schedule is developed based on student requests.
-  I understand that I must carefully choose courses. I understand that if I register for a course, **I will have to remain in that course for the entire school year.**
-  I understand that if I fail to list alternatives on the course selection sheet, and if my first choices cannot be met, I will be placed in classes and they will not be changed. I understand that I must take selecting alternatives seriously, and my schedule will not be changed in the fall because I did not carefully consider my options!
-  I understand that if I register for Advanced Placement courses, I must remain in those courses for both semesters. **Removal from an AP course can only occur if a final 1st semester average is a 69 or below, prior to receiving the additional 5 points.**
-  I understand that if I intend to take Dual Enrollment courses for the 2019-20 school year, I must return my Dual Enrollment checklist and a completed college schedule to my **counselor by NO LATER THAN May 30, 2019.** No Dual Enrollment paperwork will be accepted after May 30, 2019 and course approval will be denied.
-  I understand that I must have met all requirements for a diploma in order to participate in graduation ceremonies.
-  I understand that any objection by the student or parent to the courses recommended by the advisor should be written on a note and attached to the course registration sheet. I understand my schedule will not be changed because "my advisor made me take a course."
-  I have been given a copy of the educational information sheet. I understand that I am responsible for reading the information and contacting the counseling department if I have questions.
-  The state of Georgia requires that students take Milestone Tests in the following classes: 9th Grade English, American Literature, Algebra 1, Geometry, Biology, Physical Science, Economics and U.S. History. The Milestone grade is included on report cards and transcripts and counts 20% of each course's final grade.
-  The University System of Georgia strongly recommends those students who plan to attend a post-secondary college should take a 4th year of Math above Math of Finance and 2 years of the same Foreign Language.
-  I understand that effective August 1, 2010 the NCAA will no longer accept the GADOE's Credit Recovery Program course credits for student athletes and may not accept courses earned through Odysseyware. The NCAA will also NOT accept courses earned through Milestone "testing out".
-  I understand that Infinite Campus is a communication tool for parents to check their student's grades and may be accessed via the internet. Instructions for creating an account are available on the HCBOE website, as well as in the guidance office.
