District Technology update

We did a network upgrade over the summer with the money we received from E-Rate. We upgrade and expand our wireless & wired network throughout the district; we also upgraded our Internet bandwidth.

These network upgrades will allow us future expansion to support more devices throughout the entire district.

We are in the process of phasing out our old projectors and replacing them with TVs; The TVs have a huge impact in the classroom. They are brighter and easier for students to see. Additionally, they cost less and last longer.

We purchased two more mobile carts, 1 for RJSHS and 1 for HPE. It will help greatly when it comes to state testing this year. Our total student Google Chrome computer count is up to 475 District wide.

The plan for next year is to continue with replacing our outdated projectors and computers, and to provide more opportunities for students.
