

We Can Provide:

- ◆ Attic Insulation
- ◆ Rim Joist Insulation
- ◆ Pipe Wrap Insulation
- ◆ Mobile Home Insulation
- ◆ Weather-stripping
- ◆ Replace Broken Glass
- ◆ Caulking
- ◆ Glazing
- ◆ Heater Replacement or Repair
- ◆ Hot Water Heater Replacement or Repair
- ◆ Refrigerator Replacement
- ◆ Other Energy Conservation Measures
- ◆ Health and Safety Issue Testing
- ◆ Carbon Monoxide Testing
- ◆ Call us today for an application at 856-455-5900 !!

Eligibility Guidelines

Who can Qualify?

Elderly

Handicapped

Native American

Unemployed

Low income family

If you ...

Reside in Cumberland, Gloucester or Salem County and meet the income guidelines you can qualify!

1	24,980
2	33,920
3	42,660
4	51,500
5	60,340
6	69,180
7	78,020
8	86,860
Each Additional member	8,840

Weatherization Assistance Program

Serving These Counties:

Cumberland

Gloucester

Salem

Gateway Community
Action Partnership

What is Weatherization?

Weatherization is an energy conservation program for low income households that helps residents conserve energy and save money on their heating & cooling bills through energy conservation renovations provided **AT NO COST!**

Energy Use in a Typical Low-Income Household

**For information or an application
visit our office at:
110 COHANSEY ST
BRIDGETON, NJ 08302**

**Or Call:
(856) 455-5900**

Why should you care about air leakage in your house?

Everyone knows that air leakage can cause uncomfortable drafts in homes, but energy researchers have discovered that sealing air leaks is one of the simplest and least expensive ways to save energy in homes.

An atypical house may lose up to one third of its heat through walls and ceilings, one third through windows and doors, and one third through air leakage. A few hours of air sealing with inexpensive sealants can often reduce the air leakage by about one quarter to one half,

resulting in a savings of ten to twenty percent of the fuel bill.

New technology permits us to accurately determine what conditions must be addressed to effectively weatherize your home.

Our Field Technician will run diagnostic tests on your home with sophisticated equipment like the Minneapolis Blower Door.

What is a Blower Door?

A blower door is a large calibrated fan that is temporarily mounted in a house door to measure the leakage of the houses and to assist in finding the location of the leaks. With the variable speed fan sealed tightly into the door jamb, the pressure in the house can be adjusted. In order to measure the leakage of the house, the blower door lets the air flow through the fan and the pressure difference between the house inside and outside allows detection of leaks.

Diagnostic Tools

Testing the airtightness of a home using a special fan called a blower door can help to ensure that air sealing work is effective. Often, energy efficiency incentive programs, such as the DOE/ EPA ENERGY STAR Program, require a blower door test (usually performed in less than an hour) to confirm the tightness of the house.
