

Summary of comments on Safe Return to School Plan- as of 6-21-21

- My children are so happy to return to school without masks. I also would prefer that the Department of Health keep out of the school system. The school is to educate our children; the school is not there to complete MDH's work. No testing should be completed in school.
- Life needs to return to a new normal asap!
- It's always important for kids who are sick to stay home instead of being sent to school to infect others.
- looks good-from Missy :) NO masks
- Washing hands could be required after sneezing,coughing,blowing nose when hands are involved. I know that may seem extreme but washing hands frequently is the best first line of defense.
- Please keep our students safe in a reasonable manner. Don't over react. Keep them in school.
- Looking forward to kids returning to a more “normal” school year!
- Glad that requirements will be followed
- I approve of the no mask wearing!
- Thank you for not making them wear masks!!!!
