Children with Disabilities

- Definition: Disability

Definition of Disability: Under Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act (ADA), a “person with a disability” means “any person who has a physical or mental impairment which substantially limits one or more major life activity, has a record of such impairment, or is regarded as having such an impairment.”

Major life activities covered by this definition include caring for one’s self, eating, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, working and major bodily functions. The term “physical or mental impairment” includes, but is not limited to, such diseases, conditions, and functions as:

- Orthopedic, visual, speech and hearing impairments
- Cerebral Palsy, Epilepsy, Muscular Dystrophy and Multiple Sclerosis
- Digestive, bowel and bladder
- Neurological and brain
- Respiratory
- Cancer
- Cardiovascular, circulatory and heart
- Metabolic and endocrine
- Food anaphylaxis (severe food allergy)
- Mental retardation
- Emotional illness
- Drug addiction and alcoholism

Individuals who take mitigating measures to improve or control any of the conditions recognized as a disability are still considered to have a disability and require an accommodation.

Children with Disabilities

- *What is the school's responsibility to children with disabilities?*

Substitutions must be made for children with disabilities to ensure their ability to access school meals. Exact accommodations needed must be certified in writing by a licensed physician.
