

8451 CONTROL OF COMMUNICABLE DISEASE

The Board of Education recognizes that control of the spread of communicable disease is essential to the well-being of the school community and to the efficient operation of the school.

The Board shall be bound by the statutes and by rules of the State Board of Education for the exclusion and readmission of students who have contracted a communicable disease and of teachers and students who have been exposed to a communicable disease and for the instruction of teachers in health and the prevention of disease. The Board shall comply with regulations of the New Jersey Department of Health and the local and county Boards of Health governing the prevention, control, and reporting of communicable disease.

The teacher may exclude from the classroom and the Principal may exclude from the school building any student who appears to be ill or has been exposed to a communicable disease. A student may be isolated in school to await the arrival of or instructions from an adult member of his/her family. If the school medical inspector or the school nurse is present in the building, his/her recommendation shall be sought before any such exclusion or isolation is ordered.

Any student retained at home or excluded from school by reason of having or being suspected of having a communicable disease shall not be readmitted to his/her classroom until he/she presents written evidence of being free of communicable disease. That evidence may be supplied by the school medical inspector or another qualified physician who has examined the student.

Any student or adult who has weeping skin lesions that cannot be covered shall be excluded from school.

The Superintendent shall develop procedures for the control of communicable disease that include the instruction of teaching staff members in the detection of disease and measures for its prevention and control; the removal from school premises to the care of a responsible adult for students identified and excluded in accordance with this policy; the preparation of standards for the readmission of students who have recovered from communicable disease; the provision of appropriate home instruction to excluded students in accordance with law; and the filing of reports as required by law.

R 8451 CONTROL OF COMMUNICABLE DISEASE

- A. Detection of Communicable Diseases
1. Teachers will be trained to detect communicable diseases in students by recognizing the symptoms of disease.
 2. In general, a student who shows one or more of the following symptoms should be sent to the school nurse for evaluation and/or treatment:
 - a. Pain, generalized or specific,
 - b. Chills,
 - c. Fever,
 - d. Earache,
 - e. Vomiting,
 - f. Sore throat,
 - g. Enlarged glands,
 - h. Skin eruption,
 - i. Running nose, or
 - j. Red and discharging eyes.
 3. A student who shows symptoms of any of the following communicable diseases should be sent promptly to the school nurse for evaluation.
 - a. Chicken pox: Small reddish, itchy eruptions on the skin resembling pimples or blisters, which later fill with fluid and form crusts; slight fever.
 - b. German measles (rubella): A common cold followed by a light red rash on face and body; small beady lumps behind ears; slight fever.

- c. Measles (rubeola): Cold, runny nose, watery and light-sensitive eyes, fever, followed by bluish-white specks (Koplik spots) on inside of mouth, red blotchy rash, and dry cough.
 - d. Mumps: Tenderness and swelling of the salivary glands below and a little in front of the ear; fever.
 - e. Streptococcal infections (including scarlet fever, sore throat, and erysipelas): Sudden onset of fever, sore throat, strawberry tongue, followed by bright red rash on body, usually on the inner arm and thigh.
 - f. Whooping cough (pertussis): A common cold, with irritating cough, followed by repeated series of violent coughs without inhaling, often with respiratory whoops. Cough may end with vomiting.
 - g. Fifth disease (erythema infectiosum): Fine rash that is most apparent on the cheeks and later spreads to arms and legs, low grade fever.
 - h. Pink eye (conjunctivitis): Redness of white areas of eyes, accompanied by some itching; eyes may discharge pus and be light sensitive.
 - i. Head lice (pediculosis): Itching scalp, presence of lice and nits at hair roots.
 - j. Impetigo (staphylococcus infection): Lesions.
 - k. Meningitis-meningococcal: Severe headache, chills, vomiting, convulsions, fever, stiff neck, pain in neck.
 - l. Hepatitis infectious: Fever, anorexia, nausea, malaise, abdominal discomfort, followed by jaundice.
4. Any person who is ill or infected with any disease below and as outlined in N.J.A.C. 8:57-1.3 or any communicable disease, whether confirmed or presumed will be reported immediately by the school Principal to the County Health Officer or to the New Jersey Department of Health if the County Health Officer is not available. Such telephone report will be followed up by a written report or electronic report within twenty-four hours of the initial report. The diseases to be immediately reported are:
- a. Botulism (Clostridium);

- b. Diphtheria (*Corynebacterium diphtheriae*);
- c. *Haemophilus influenzae*, invasive disease;
- d. Hepatitis A, institutional settings;
- e. Measles;
- f. Meningoccal disease (*Neisseria meningitidis*);
- g. Pertussis (whooping cough, *bordetella pertussis*);
- h. Plague (*Yersinia pestis*);
- i. Poliomyelitis;
- j. Rabies (human illness);
- k. Rubella;
- l. Viral hemorrhagic fevers, including, but not limited to, Ebola Lassa, and Marburg viruses;
- m. Foodborne intoxications, including, but not limited to, mushroom poisoning;
- n. Any foodborne, waterborne, nosocomial, outbreak or suspected outbreak or any outbreak or suspected outbreak of unknown origin;
- o. Any other disease included in N.J.A.C. 8:57-1.3.

B. Exclusion From School

1. A student who exhibits any of the symptoms described in A2 or whose condition suggests the presence of a communicable disease as described in A3 or A4 will be sent to the school nurse's office. The teacher will ensure that the student is accompanied by an adult or a responsible student.
2. The teacher will communicate to the school nurse, directly or by written note, the reason for which the student is sent for medical assessment.

3. The school nurse will examine the student and, in consultation with the school medical inspector if the student's condition so indicates, recommend to the Principal the student's exclusion from school for medical reasons.
4. In the event neither the school nurse or the school medical inspector is available to be consulted about the student's condition, the Principal may determine to exclude the student from school.
5. The parent, adult family member, or other responsible adult designated by the parent will be promptly notified by telephone of the students' exclusion and requested to come to school to fetch the student. Until the adult arrives to remove the student, the student will be kept in an isolated location in the school and will be made as comfortable as possible. The student will be supervised at all times by a school staff member.

C. Readmission to School

1. A student who has been excluded from school or retained at home by reason of having or being suspected of having a communicable disease shall not be readmitted to school until the student presents written evidence that he/she is free of communicable disease.
2. Evidence that a student is free of communicable disease will consist of the certification of the school medical inspector or another qualified physician who has personally examined the student.

No student who has had a communicable disease will be readmitted to school until a physician's certificate indicating the symptoms of the disease have ceased has been provided to the Principal or designee or the school nurse.

D. Reports

1. The school nurse will file such reports as may be required by the New Jersey State Department of Health and in the reporting of communicable diseases in school.
2. When the rate of school absenteeism is in excess of fifteen percent, the school nurse shall report the absenteeism to the local and/or the County Board of Health.

3. The teacher may, with the advice and consent of the Principal and the school nurse, inform the parent(s) or legal guardian(s) of students in his/her class that a student in the class has contracted a communicable disease. The information given to parents or legal guardians may include the specific symptoms of the disease and parent(s) or legal guardian(s) may be encouraged to consult their personal physicians for inoculations that may prevent the disease or ease the symptoms of the disease.
