Question 2 .

Paragraph 1

Jarome Iginla is one of the best players in National Hockey League. Iginla has played for the Calgary Flames since 1996. He led the NHL in points scored from 2001 to 2002. For 10 years of his career, only one other player scored more goals than Iginla.

Paragraph 2

He is the first black player to be chosen to lead an NHL team. He has also won the Lester Pearson Most Valuable Player Award. He has been named an NHL All-Star Player five times. Iginla was chosen to be captain of the Calgary Flames in 2003.

Paragraph 3

He helped the Canadian hockey team win its first gold medal in 50 years. Iginla broke the Flames' record for number of games played. Iginla played in the 2002 Winter Olympics. He has played in more than 800 games. Iginla has also scored the most points in the team's history.

Paragraph 4

Iginla donates \$2000 to charity every time he scores a goal. He started the Jarome Iginla Hockey School. In 2004, Iginla was selected for two NHL community service awards. The King Clancy Memorial Trophy and NHL Foundation Player Award both recognized his charity work. Proceeds from the school go to the Diabetes Research Association. Iginla receives almost as much attention for his work off the ice.

Question 3 .

Directions: Drag each tile to the correct box.

Angelica is writing an opinion piece about starting a school garden. Put the sentences of Angelica's piece in the correct order.

What's more, we could learn about natural ways to control pests and do something good for our environment.

In this day and age, it is usual for elementary schools to have a school garden.

Surprisingly, our school has not yet built a school garden, and I, for one, would welcome it.

For one thing, our garden would be a tremendous hands-on way to learn about making good soil.

Question 4 .

Directions: Select the sentence that is in the wrong place in the passage.

Early Native Americans

Before Europeans settled in North America, the Native Americans lived off of the land. **Native Americans relied on the natural resources of their land to get food and materials for clothing and shelter.** Native Americans mostly bartered for goods. **Barter is another word for trade.** Different tribes exchanged goods with each other. Some Native Americans traded jewelry, pottery, and a kind of money called wampum which was usually made of clam shells. **Tribes living near rivers, lakes, and oceans set fish traps for meat.** Native Americans never used gold for trade or money. **The Native American trade network was quite large, and goods were traded over long distances.**

Almost all Native American tribes hunted and farmed. Most Plains tribes hunted buffalo for meat. Eastern Woodlands tribes hunted deer and smaller animals. Southwest tribes farmed corn, beans, and some fruit and hunted mostly small animals.

Question 6 .

Mars Rovers

(1) The United States space agency known as NASA launched two robot rovers to study Mars. (2) The goal was to see if Mars ever had water. (3) It has turned out to be a successful mission!

(4) The rovers launched in the summer of 2003. (5) It took them about six months to reach Mars. (6) The rovers landed on Mars with big airbags to bounce along the surface. (7) Then, the rovers drove around Mars and tested the soil. (8) These tests have shown that Mars probably once had water. (9) NASA named the two rovers *Spirit* and *Opportunity*. (10) The rovers also sent back many pictures.

(11) These rovers were meant to work for 90 days on Mars. (12) Amazingly, *Spirit* lasted for six years, but stopped working in 2010. (13) *Opportunity* continued to work more than eight years after arriving!

(14) Another robot rover named *Curiosity* landed on Mars in the summer of 2012. (15) This rover is bigger than *Spirit* or *Opportunity*, weighs about one ton, and is the size of a car! (16) *Curiosity's* mission is to see if life could have existed on Mars. (17) This rover will use lasers and other gear to test the soil.

Due to their endurance, these two small rovers have been worth their big price tag.

The War of the Worlds

by H. G. Wells

BOOK ONE **THE COMING OF THE MARTIANS**

CHAPTER ONE **THE EVE OF THE WAR**

No one would have believed in the last years of the nineteenth century that this world was being watched keenly and closely by intelligences greater than man's and yet as mortal as his own; that as men busied themselves about their various concerns they were scrutinised and studied, perhaps almost as narrowly as a man with a microscope might scrutinise the transient creatures that swarm and multiply in a drop of water. With infinite complacency men went to and fro over this globe about their little affairs, serene in their assurance of their empire over matter. ... Yet across the gulf of space, minds that are to our minds as ours are to those of the beasts that perish, intellects vast and cool and unsympathetic, regarded this earth with envious eyes, and slowly and surely drew their plans against us.

Is It a Bird? Is It a Plane?

When a new alien movie hits the big screen, reports of alien activity often increase. A new book on aliens can have the same effect. Many of these reported sightings happen at night, or when the person is driving along a deserted road.

During World War II, many British and American pilots said they saw bright shining balls near their aircraft. They called them 'foo fighters', after a comic that was popular then.

Between 1947 and 1969, the United States Air Force studied 12 618 UFO sightings in 'Project Blue Book'. They discovered that only 701 of

the sightings were really unidentified. The rest were explained as aircraft and satellites, weather balloons, the planets Venus or Jupiter, meteors, or unusual clouds. Some were also put down to very good imaginations!

This photo of a Japanese fighter plane, taken in 1945, is said to show two 'foo fighters' in the distance.

Your turn

- I** An exposition argues for or against something. It tries to persuade the reader. Write an exposition about aliens — decide to argue for or against the existence of aliens. Use the texts on pages 24–25 for background information.

Write a strong title.

Introduce the topic and state your point of view.

Make at least three supporting points and back each one up with evidence.

Summarise your point of view.

An exposition argues for or against something. It has:

- the author's point of view
- arguments with supporting evidence
- persuasive words
- a conclusion
- a recommendation for further action.

Persuasive writing

- 1** Evaluative language uses words which place a value on the topic, eg *His argument was useless. It was completely false!* Write three sentences using evaluative language to persuade your reader that it is unwise to believe that aliens can visit Earth.

- 2** Emotive language uses words which play on people's emotions, eg *The Aliens approached the defenceless, terrified people in the deserted farmhouse.*

Write three sentences using emotive language to convince your reader to donate to a charity that protects stray animals.

- 3** Rhetorical questions ask the reader about something, but they don't expect an answer, eg *What would any sane person think?* The answer is usually obvious.

Rhetorical questions focus attention on a topic. Draw lines to connect the halves of each rhetorical question.

Unit 8: It's only water ...

Water and Your Home

Many people in the world enjoy access to lots of clean, fresh water. How does it get to their homes?

Fresh water is pumped from a lake or dam to a water filtration plant, where it is filtered to remove weeds, fish and minerals. It is then pumped into storage tanks.

From the storage tanks it moves into underground water **mains**, which carry water to taps in our houses. When we open the tap, the pressure in the pipes pushes the water out. Water pipes can also be connected directly to wells or **boreholes** to provide water to houses that are not connected to the water mains.

We cannot drink less water, but we can find ways to use less of it for other things. Some ideas are:

- Repair dripping taps.
- Take a quick shower instead of a bath.
- Wash dishes in a sink, not under a running tap.
- Wash the car with a bucket of water instead of a hose.
- Water the garden at cool times of the day.

Can you think of other ways to conserve water?

Using less

In industrialised countries, each person uses up to 1 000 litres of water every day to drink, cook, wash, flush toilets and water gardens. However, in countries where water is not piped into houses, people use as little as five litres per day.

How money turns into water

You make a donation. Thanks!

Many non-government organisations (NGOs) do development work in other countries.

The money is added to the NGO's general funds.

The NGO also needs money for administration, such as paying staff and renting an office.

The NGO decides which projects to support.

The NGO forms a committee to decide which projects to support. The NGO works with partner organisations in other countries to design projects, such as building toilets or funding a community nurse.

Water for Everyone?

All humans need water to survive. In modern, industrialised countries, clean water is easy to find — we simply turn on a tap. In some countries, water is a luxury. More than one billion people in the world do not have access to clean, safe water.

Not enough water

In the **Developing World**, many people cannot get enough water for drinking and cooking. If they can find water, they may have to carry it long distances from rivers and wells. Women and children spend a large part of every day fetching water. This prevents them from doing important work and going to school.

If there is a drought, there is no water to collect.

Dirty water kills

Where there is no running water, people don't have flushing toilets and sewerage systems.

Human and animal waste ends up in rivers and can cause diseases. Every day about 6 000 people in the Developing World, mostly children under the age of five, get sick and die from drinking polluted water.

The United Nation's Millennium Development Goals call for the number of people who don't have sustainable access to safe drinking water and basic **sanitation** to be halved by the year 2015. This big goal can be achieved if governments make water and sanitation a funding priority for the world's poorest people.

This traditional, hand-dug well in Mali isn't deep enough to reach a steady supply of water.

Money is sent to the partner organisation.

Local villagers and the partner organisation buy materials and start work.

A village gets clean water!

Clean water means better health and less disease.

The project is reviewed.

The partner organisation and the NGO check that the money was spent as planned, and that the project is a success.

The NGO may receive extra funds.

AusAID, the Australian Government agency for international development, may give extra money.

Sentences

- 1 Nearly every sentence contains a subject and a verb.** Add verbs to these subjects to build sentences. Add singular verbs to singular nouns, and plural verbs to plural nouns. End each sentence with a full stop, question mark or exclamation mark.

My dog **slept**.

- a** Those trees
- b** The large organisation
- c** His pet goat
- d** Four old men

- 2 Add an adverb to each sentence to add meaning to the verb.**

My dog **slept soundly**.

- a** Those trees
- b** The large organisation
- c** His pet goat
- d** Four old men

- 3 A phrase is a short group of words with a preposition but without a verb, eg *across the lake*.** It can act like an adverb or adjective.

Add words to build phrases in these sentences. Remember: no verbs!

- a** Friends gathered *at the*
- b** They respected the man *from*
- c** *After* _____, they all left to go home.
- d** A reporter interviewed people *at*
- e** A report was published next day *in*

- 4 Add adverbial phrases to these sentences to tell *how, when, where* or *how much*.**

- a** Villagers cheered when their water supply arrived (*say how*)

- b** New pumps were built (*say where*) _____,
so everyone had water.

- c** (*Say how long*) _____, the village had been
without fresh water.

d Fresh water saved the village (say where) _____
from disaster.

e (Say when) _____, the children would
have to carry water home.

5 Write adjectival phrases to add detail to the subjects of these sentences, eg *The boy with a sweet smile was planning to be very naughty.* *With a sweet smile* describes the boy.

a The village children _____ squealed and
clapped their hands.

b Water _____ flowed down their chins.

c Mothers and fathers _____ laughed loudly.

d _____, the sun rose over the village.

6 Sentences must have a consistent tense. For example, a sentence that starts in the past tense must use the past tense all the way through. Underline the mistakes in these sentences.

Last week, the NGO took its teams into Sudan and give help to farmers. To help the NGO, we will donate money from our charity fund and counted it. It isn't as much as we think, so we needed to donate more.

7 Write adjectival clauses to describe the people in the sentences.

Remember: a clause has a verb.

a Jason, _____,
fell head first into the mud.

b We searched everywhere for Harry _____.

c The pup _____ was missed by his owner.

d Down the road rolled the truck _____.

e Quick thinking by the driver _____
stopped the runaway truck.

f The committee, _____,
decided to support the projects immediately.

UNIT 12: TREES FOREVER?

Forests cover almost one-third of the Earth's land.

The boreal forests in Siberia make up the largest forest region. They cover almost four million square kilometres.

The Amazon rainforest is shrinking every day. People cut and burn down trees for wood products and to clear the land for farms. Most of the temperate forests that once covered Europe and North America have already been cleared.

GO FACT!

DID YOU KNOW?

Trees produce the oxygen we need to breathe.

Winter lasts at least six months in the Siberian forests.

Sustainable Forests?

Forests play an important role in the health of the planet, but we continue to cut them down. Is it possible to use forests without destroying them?

What do forests mean to people?

Forests mean different things to different people. To the native Indians of Brazil, the forest is their home. A logging company sees a forest as a source of timber. For a logging worker, it is a place to work and earn a living. To someone living in a city, a forest might be a place to find peace and relaxation. For governments of developing nations, forests provide products to export, and people with land for farming.

For and against

Logging companies argue that forests are a renewable resource to use in a sustainable way — new trees can be planted to replace the ones removed. The logging industry employs many people, and logging produces

things that people want, such as timber, paper, tissue, cardboard and furniture.

Conservationists say that forests, especially tropical rainforests, are vital to the health of the planet. They want logging in "old growth forests" — the mature forests that have not been disturbed by people — to stop because forest ecosystems are damaged by logging. They argue that trees should only be logged from plantation forests, which are "tree farms" grown especially to be cut down for wood products. Conservationists believe that people working in the old-growth logging industry could find jobs in the plantation timber and tourism industries.

Wood

Wood is a natural material from living trees. It is made of plant cells.

Plant cells contain **cellulose**, a type of sugar. It links together to make wood fibres.

Wood burns easily. Its main use for thousands of years was as a fuel for cooking and heating. Wood is also used as a building material because it is strong and light compared to other building materials. Australia removes about 25 million cubic metres of wood from its forests each year.

Wood can be made into synthetic materials. Particle board is made from pieces of wood mixed with wax and glue. Particle board is cheaper and denser than natural wood. It is used to line ceilings and walls and to make furniture.

13 How would a “tree farm” be similar to other types of farms?

Your turn

I Many discussions end with a conclusion.

Write a conclusion for *Sustainable Forests*?

It may — but doesn't have to — support one side of the discussion.

2 a Brainstorm the arguments for and against logging old growth forests with classmates. ★ Done

b Write a discussion about the topic.

Can Old Growth Forests Survive?

A discussion looks at more than one point of view. It may end with the writer's point of view or summarise both points of view. It has:

- an introduction that describes the issue
- paragraphs with arguments for and against (each argument should have supporting evidence)
- words that show importance and value
- a conclusion that may or may not support one side.

Introduce the topic.

Arrange your points for both sides of the discussion and write them in sentences. Use modal language, such as *we must not* or *nobody cares enough*. Add supporting statements to your points.

Use connectives, such as *On the other hand* or *However*, to begin sentences.

End with a conclusion about the topic.

Editing and proofreading

The first draft of your writing is rarely your best writing.

I Edit and rewrite these texts.

4. C

6. C
7. D
8. --
9. D
10. A

Explanations: Math - Numerical Expressions

1. In the given expression, 60 is subtracted from $\left(1,325 \div \frac{1}{3}\right)$.

So, **the given expression is sixty less than** $\left(1,325 \div \frac{1}{3}\right)$.

2. In the statement, addition is to be done first.

"Add 6 and 9." $6 + 9$

"Then, subtract 3." $6 + 9 - 3$

Therefore, the correct answer is $6 + 9 - 3$.

3. In the given expression, $(2,441 - 711)$ is being divided by 4.

Therefore, **the given expression is one-fourth the value of** $(2,441 - 711)$.

4. In the given expression, 200 is being added to (28×54) .

Therefore, **the given expression is 200 more than** (28×54) .

5. In the given expression, $(4,617 + 19.17)$ is multiplied by 3.

So, **the given expression is three times as large as** $(4,617 + 19.17)$.

6. In the statement, subtraction is to be done first.

"Subtract 3 from 9." $9 - 3$

"Then, add 4." $9 - 3 + 4$

Therefore, the correct answer is $9 - 3 + 4$.

7. Parentheses show which operation should be done first.

In the statement, addition is to be done first.

"Add 6 and 7." $(6 + 7)$

"Then, multiply by $\frac{2}{3}$." $\frac{2}{3} \times (6 + 7)$

Therefore, the correct answer is $\frac{2}{3} \times (6 + 7)$.

8. Notice the sum $(20 + 75)$ is consistent throughout all the expressions. Two of the expressions are being multiplied, and two of the expressions are being divided.

Dividing by a number greater than one will create a quotient less than the original number or expression. When the dividend is the same, the larger divisor has a smaller quotient.

Multiplying a number or expression by a number greater than one will create a product greater than the original number or expression.

Therefore, the expressions in order from least to greatest are shown below.

$$\frac{(20 + 75)}{6} < \frac{(20 + 75)}{2} < (20 + 75) \times 3 < (20 + 75) \times 4$$

9. In the statement, division is to be done first.

"Divide 19 by 3." $19 \div 3$

"Then, add 4." $19 \div 3 + 4$

Since division is always done before addition, parentheses are not needed around the division part of the expression.

Therefore, the correct answer is $19 \div 3 + 4$.

10. Parentheses show which operation should be done first.

In the statement, addition is to be done first.

Add 15,050 and 5.61. $15,050 + 5.61$

Then, multiply by 2. $2 \times (15,050 + 5.61)$

So, the correct answer is $2 \times (15,050 + 5.61)$.

Explanations

1. This story should tell the events in the order that they happened. Sentence 11 says that Michael woke up at dawn. In the rest of the story, Michael does things that would most likely happen after someone wakes up. For example, someone cannot eat breakfast before waking up.
2. Paragraph 1 is the only paragraph organized in a way that makes sense. In paragraph 2, the sentence about Iginla being chosen as team captain should come before the one about him being the first black player to lead an NHL team. Paragraph 3's information about Iginla playing in the 2002 Winter Olympics should come before the information about the Canadian team winning a gold medal. In Paragraph 4, the sentences are completely out of order.
3. This is the logical order of the points in the opinion piece:
 1. In this day and age, it is usual for elementary schools to have a school garden.
 2. Surprisingly, our school has not yet built a school garden, and I, for one, would welcome it.
 3. For one thing, our garden would be a tremendous hands-on way to learn about making good soil.
 4. What's more, we could learn about natural ways to control pests and do something good for our environment.
4. The first paragraph is about how Native Americans traded goods. The sentence "Tribes living near rivers, lakes, and oceans set fish traps for meat" is about how Native American tribes living near sources of water would fish. This sentence would fit better in the second paragraph.
5. It is important to organize writing to make sure that passages can be read fluently. The sentence "If you pack an item not allowed, you will probably have to throw it away before proceeding past security" best fits after sentence 15.
6. The sentence should be added in the place that makes the most sense. Sentences 12 and 13 state that the rovers lasted much longer than they were supposed to. Therefore, the sentence "Due to their endurance, these two small rovers have been worth their big price tag" fits best after sentence 13 because sentences 12 and 13 support the author's opinion about why the rovers are worth their price tag.
7. If you follow the way the passage is organized, you'll see that the author tells about the freeing of the whale. The biggest clue that this sentence belongs at the end is the word "finally."
8. The events in this story should be written in the order that they happened. The first sentence should tell the reader the first thing that happened that morning. Waking up is the first thing to happen in the morning. All the other events of Holly's morning have to happen after she wakes up. The first sentence should be "Holly woke up in the morning excited about her first day of school."
9. To best organize the passage, "These rules are for the safety of all passengers" should be placed after sentence 11.
10. The sentence should be added in the place that makes the most sense. The sentence "In contrast, the staff would use less time and money to prepare cold sandwiches" fits best after sentence 6 because it contrasts the information in sentences 5 and 6 about the time and money wasted on uneaten meals.
