

Mobile County Public Schools is establishing internet wi-fi hotspots at its schools. Twenty-one schools currently have operational hotspots, which can be accessed outside the buildings and in parking areas.

Whether learning remotely or in need of wi-fi access over the weekends, MCPSS students can visit any of these sites at any time and access the wi-fi listed as “MCPSS Outdoor Wi-fi” using the same credentials used for regular miDevice internet access.

Below is a list of schools that currently have wi-fi hotspots up and running, with the parking areas where they are best accessed. MCPSS is continuing to work to establish hotspots at other schools not on this list.

Alba -- parking lot near front office, open area near portables
