# Using iReady from Home

Students have unlimited access to their online lessons and i-Ready math learning games. However, teachers have recommended goals for students. Please talk with your child's teacher about specific i-Ready time & lessons passed goals.
Students cannot access diagnostic, growth monitoring, or standards mastery tests from home.

To access i-Ready from home:
1. Go to Taylor County School District Website http://www.taylor.k12.fl.us/
2. Click on ClassLink Launchpad icon.
3. Students use same login information used at school. (student number and computer password) *contact student's teacher for student login information*

4. Click on the i-Ready app in ClassLink.
5. Select subject. (Reading or Math)
6. Start lesson under My Path or Teacher Assigned.

Students cannot access diagnostic, growth monitoring, or standards mastery tests from home.
Students do not have a username and password for i-Ready since the district uses the ClassLink portal.

Troubleshooting Tips:

- **iPad:** Download the free "i-Ready for Students" app from the App Store® . iPads must be compatible with iOS 11.3 or above, such as the iPad Air, iPad Air 2, iPad Pro, or any other device that meets these requirements: i-Ready. Com/SystemCheck. Then, go through ClassLink as described above. **iPads that cannot upgrade to iOS 11 or higher, such as the iPad 2 and the iPad 3, will not work with the i-Ready for Students app and are not supported.**
- Students with iPad Minis are able to use the i-Ready for Students iPad app if they are using a device capable of operating on iOS 11 or above. **However, educators should note that i-Ready was not designed for the screen size of an iPad Mini and we do not support its use.**
- Chrome is the preferred browser for i-Ready. Chrome 74 or higher • Edge 17 or higher • Safari 12.1 or higher • Firefox 66 or higher
- Outdated browsers can cause problems with i-Ready.
- Clear the cache. Use the key combination: Ctrl+Shirft+Del
- i-Ready Technical Support is available to help parents:

Tips to Support Child's Learning:

Discussing *i-Ready* Data with Your Child

1 **My Progress:** Ask your child to click on My Progress at the bottom of the home page.

- Consider asking general questions such as, "How is *i-Ready* going?", "What are you learning about?", or "What are you working on?"

2 **Lesson Stats:** This section shows your child stats about their online lessons.

2a **Time-on-Task:** Look at the number of minutes your child has spent this week on Online Instruction. Consider asking, "Have you met your goal?"

2b **Lessons Passed:** Look at the total number of lessons your child has passed this school year. Consider asking, "What is your goal?" or "What are you proud of?"

3 **Lesson Streak:** See how many lessons your child has passed in a row. Congratulate them and ask about what they are learning.

4 **Completed Work:** Ask your child to click on Completed Work.
- You will see lesson names and quiz scores. Consider asking, "What did you learn in ___ lesson?", "What did you enjoy?", "What did you find challenging?", or "How do these lessons relate to your learning goals?"
- You might also see your child's last Diagnostic score. Consider asking, "What were your strengths?", "What are your areas for growth?", or "What are your goals?"

5 **Learning Games:** If your child's school has access to Learning Games, which provide mathematics fluency and skills practice, they can click the Learning Games icon on the bottom right. Your child should play games for roughly 20 minutes per week. Ask your child, "What game are you playing?", "Why?", "What are you learning about?", or "How does this game relate to your learning goals?"

Tips to Support My Child's Learning

- **Speak with your child about how using *i-Ready* will help them prepare for class work.** Also explain that *i-Ready* will show teachers where your child is doing well and which topics need some more review.

- **Encourage your child to take each lesson and quiz question seriously.** Emphasize "thinking before clicking," because just clicking through will not give teachers an accurate report of what your child knows.

- **Encourage your child to use the tools that appear at the bottom of the screen in some lessons.**

- **Help your child identify and become familiar with the different parts of the student dashboard.** For more about the student dashboard, see below.

- **Track and celebrate your child's progress.** (Your child should aim for 45 minutes of *i-Ready Instruction* per subject per week and maintain a range of 30–49 minutes of Online Instruction while passing at least 70 percent of lessons. Your child's school may have varying guidance.)

- **Contact your child's teacher about how often your child should practice at home,** or with any other questions about *i-Ready*.
