## Remote Testing Quick Guide for Students and Parents

### Remote Connectivity Check

Click [here](#) to run the diagnostic check.

From the diagnostic site, students and their families can also test their connection for remote administration. To test the student's connectivity, select **Remote Connectivity Check**.

## Network Diagnostics

Your Operating System: Windows 10      Your Browser Version: Chrome v88

Secure Browser: false

### Bandwidth Diagnostic

There are variety of tests that can be conducted to determine if you have the adequate network bandwidth available. Please choose the appropriate test below for your unique situation and follow the steps.

- I work for the school or district and I'd like to know how many students I can expect to test concurrently at my location.
- I am a student who will be taking a test remotely.
- I am a test administrator who will be proctoring an exam remotely.

## Remote Testing Quick Guide for Students and Parents

---

1. In the *Connectivity Check* field, Select **Run Connectivity Check**.

### Remote Administration Connectivity Checks

Please perform the check below to test your connection for remote administration.

#### Connectivity Check

This diagnostic test will perform a variety of checks on this web browser, the device, and the networking capabilities that are enabled to ensure remote administration features within the Test Delivery System work correctly. Please make sure you are running this diagnostic test from the browser and device you will be using during the test administration and any VPN connections are disabled.

Run Connectivity Check

Select the [Run Connectivity Check] button to test this device for all the features to support a remote administration. This may take 2 to 3 minutes.

2. The connectivity check will indicate if the student's device is capable of supporting all features for remote administration. If the student's connectivity check does not pass, notify the **Student IT Support** on the [district website](#) to troubleshoot the problem before the day of the test.

#### Connectivity Check

This diagnostic test will perform a variety of checks on this web browser, the device, and the networking capabilities that are enabled to ensure remote administration features within the Test Delivery System work correctly. Please make sure you are running this diagnostic test from the browser and device you will be using during the test administration and any VPN connections are disabled.

Run Connectivity Check

Select the [Run Connectivity Check] button to test this device for all the features to support a remote administration. This may take 2 to 3 minutes.

**Next Step:**

All of the connectivity checks have passed, and your device should be ready for remote administration. Please select the [Everything Passed] button below to proceed.

Everything Passed
