

# Quarantine Details

as of 1/5/2021

- Quarantine may end after Day 10 without testing if no symptoms have been reported during daily self-monitoring.
- Quarantine can end after Day **7** if a **RT-PCR (send off) diagnostic specimen is negative** (this is a send-off test that will take at least 48 hours to come back and is required by MSDH) and if no symptoms were reported during daily self-monitoring. ***A rapid test result will not be accepted, per MSDH. The testing cannot be done prior to Day 5 in order to modify quarantine. We do require proof of the type of testing that was performed and the date it was collected in order to modify quarantine.***
- **Testing cannot be performed until Day 5.** If negative, the student can return to school after Day 7.
- A negative test collected prior to 5-7 days will not be used to determine modification of quarantine.
- **The following criteria must also be met in order to end your quarantine after Day 7 or 10:**
  - No symptoms of Covid-19 have been identified during the entirety of quarantine up to the time at which quarantine is discontinued.
  - Daily symptom self-monitoring continues through quarantine Day 14.
  - Individuals continue to adhere to mask and physical distancing.
  - ***If any symptoms develop, you should immediately self-isolate and receive testing for Covid-19 and notify your school and school nurse.***
